

March NEWSLETTER 2011

PRODUCT CHANGES

15L drums will now be used for various products due to OH&S laws regarding chemical weight. This will make it easier for you and your staff to lift and take up less storage. Affected products include **Liquid Pool Chlorine, Hot Plate Cleaner & Wool Wash** just to name a few. This does not affect drum returns.

INVOICING & STATEMENTS

Nowra Chemicals is in the process of updating our Debtor Files to send Invoices and Statements via Email.

Could you please email kristy@nowchem.com.au or Fax (02) 4421 4932 with your current email address or email where you would like to receive your invoices and statements. Otherwise they will now be sent with deliveries

PRICE INCREASE ON THE WAY

Despite the increase in the Australian dollar, the price of oil has gone over \$100 per barrel. This will lead to price increases in all plastics and most raw materials. Even though most raw materials we use now are from plant based sources such as coconut and palm oil, the increase in oil over \$100/barrel makes the production of biodiesel more economical and so much of the material moves in this direction.

The good or bad news is that NOWCHEM and many other companies move to plant based raw materials and the demand is increasing every year. Although a renewable resource, demand is high.

Short answer is—price increase is coming so

BUY NOW

PROMOTION

Well done to Casey who has been promoted to the role of Sales Manager within the company. This means we will be employing a new sales representative. Casey will still be available to help clients with what he does best, **solve problems & get things done.**

CONGRATULATIONS TO CASEY ON THIS GREAT PROMOTION

Hard Job Cleaner

Hard Job Cleaner can be used as a "Spray-on, wipe-Off" cleaner for soiled areas such as walls, painted surfaces, tiles, venetian blinds, vinyl upholstery, stainless steel, laminated surfaces, enamel surfaces, light fittings, wooden and metal benches and porcelain. Hard Job Cleaner is biodegradable and safe to use in conjunction with septic systems.

March NEWSLETTER 2011

EcoSoftT Premium Green

Sustainable Towel and Tissue

How tree friendly is your recycled paper?

Sadly, based on most global definitions, recycled paper can still contain virgin pulp. Hence trees could still be cut down in the manufacture of your recycled paper products.

Bay West EcoSoftT Premium Green towel and tissue products are made from 100% recycled wastepaper and are derived from 100% post-consumer waste, thus making EcoSoftT Premium Green products among the most environmentally preferable towel and tissue lines available in the away-from-home market.

Thoughtful Consumption

Bay West EcoSoftT Premium Green towel and tissue products can help your organisation adopt the powerful concept of Thoughtful Consumption, to further enhance any existing environmental stewardship programs already in place.

Trees help us breathe and provide a home for countless numbers of animals and insects.

Trees are the largest and longest living organisms on earth and form an integral part of our ecosystem and our planet.

The lifecycle of a tree is significantly extended through the manufacture of 100% recycled, 100% post-consumer waste paper products.
