PRODUCT BUYERS' GUIDE

ERGONOMIC MOPPING

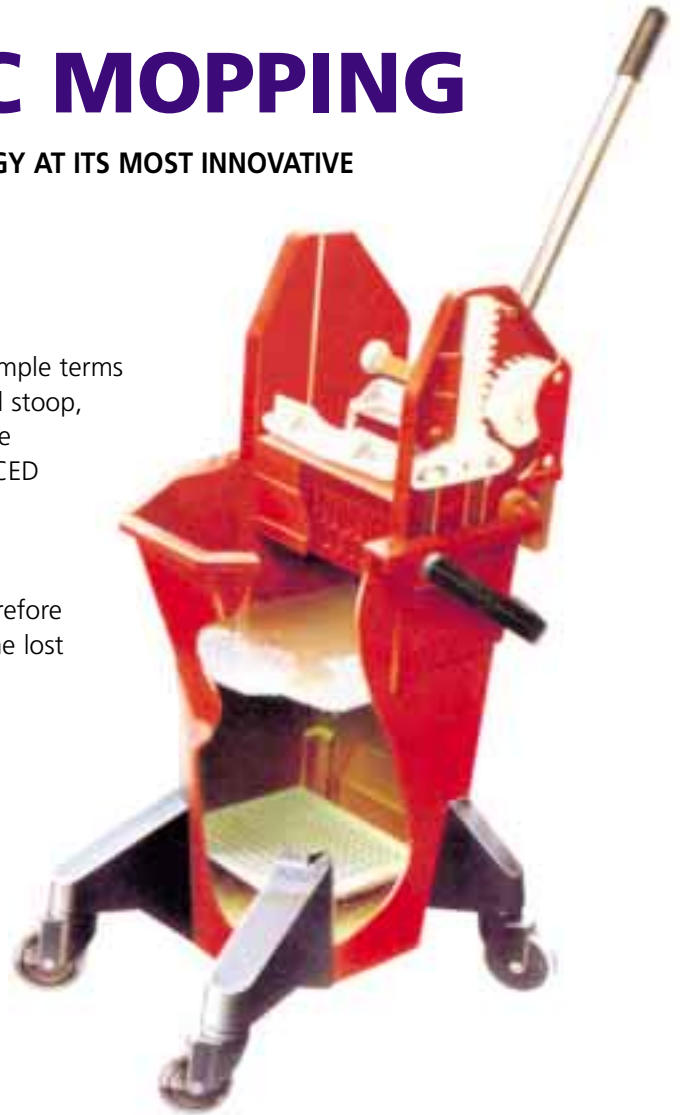

WRINGER & BUCKET TECHNOLOGY AT ITS MOST INNOVATIVE

ERGONOMICS

SYR Wringers and Buckets are ERGONOMICALLY OPERATED. In simple terms they are easy and safe to use. Other wringers make you bend and stoop, they leave the mophead wet by comparison. SYR Wringers provide hugely increased leverage through LONG HANDLES and REINFORCED GEARING.

Result!

Much drier mopheads, that leave floors cleaner and drier and therefore safer. BACK STRAIN INJURY, which is **the** major contributor to time lost through accident is greatly reduced.

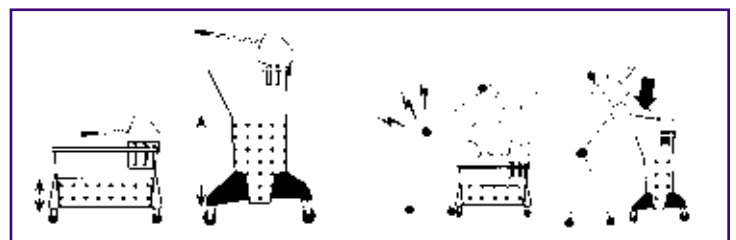

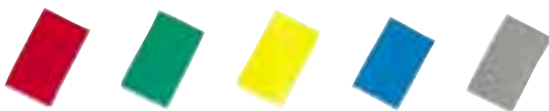

BUCKET SHAPE

Methods have been transformed with the new shape of Interchange Buckets. Working water has been tripled in depth to 35cm - 15". Normal mop buckets have a working water depth of less than 12cm - 5".

Result! - Cleaner mopheads, cleaner safer floors.

COLOUR CODING

Most interchange items are available in five colours.

Result! - allows end users in the Food and Healthcare Industries to demonstrate that they are using "Due Diligence" to ensure that equipment used to clean toilets and urinals is not being used to clean kitchens or public eating areas and visa-versa.

ATTENTION!

Double your Wringer and Bucket Warranty from 12 months to 24 months by using SYR Freedom II Mops. (Ask your Distributor for details).

1 LTS – ERGONOMIC BUCKETS

- Easy Clean Polypropylene
- Complete with grid and dirt sump
- 12 Litre working water capacity
- 7.5cm non marking castors
- Cranked legs all round for greater stability

SYR & EDUCATION – THE WORLD OF MOPPING

SYR mops are a natural favourite with cleaners who prefer round mops. The easy-to-use round design ensures maximum contact with floor surface. Lift & 'Twirl' to create the perfect round mopping shape. Freedom II's oblong shape twists out more water.

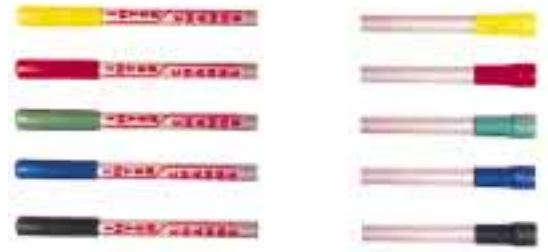

SYR INTERCHANGE HANDLE

Every cleaners pet hate is fiddling with mop handles to change dirty or contaminated mopheads. All managers hate having to purchase scores of different handles to fit all sorts of cleaning tools
