

PRODUCT INFORMATION SHEET

DISH MACHINE POWDER

PRODUCT DESCRIPTION

Dish machine Powder is suitable for all industrial and domestic dishwashers. This highly concentrated chlorinated formula removes coffee stains and baked on soils. This formula contains a mild descaling agent, saving time and money in commercial kitchens reducing the amount of time between acid descaling. Dish machine powder is also a very effective cleaner for the removal of grease and oil from hard surfaces including degreasing kitchen and food processing plant floors.

DIRECTIONS FOR USE

The product should be placed into the automatic dispensing unit. If hand dosage is required, use approximately 125g (1/2 cup) per 10 litres water. On follow up washes use 30g every 3 washes. Ensure the wash tank is emptied at the end of each shift to prevent the build-up of fats and oils. For best results use in conjunction with Nowchem Rinse Aid to assist with drying streak free.

Floor Cleaning: Wet area with hot to warm water. Sprinkle powder on the stain and broom in. Hose off and re-apply if necessary.

FIRST AID & SAFETY

Class 8 Risk: Corrosive

Alkaline powder. **Considered Hazardous.** Avoid contact with skin and eyes. Wear gloves and eye protection when handling. Keep out of reach of children. If swallowed seek medical advice. If poisoning occurs contact a Doctor or the Poisons Information Centre. If swallowed do NOT induce vomiting, give water. If skin contact occurs wash affected area and remove clothing. If in eyes, hold eyes open and flush with water for a minimum of 15 minutes. Call a Doctor.
